More Than Rugged – It's Secure Networking.

The Conquest F5_{SE} is engineered for environments where communication cannot fail.

Powered by SLink™ Zero Trust Networking, it goes beyond durability, creating a secure, trusted communication channel that connects your frontline teams directly to enterprise platforms and cloud systems.

Zero Trust. No VPN. No Exposure.

SElink™ replaces VPNs and firewalls with Zero Trust Networking and endpoint authentication.

Each Conquest F5_{SE} becomes a micro-segmented endpoint, ensuring only authorized applications can connect.
No open ports. No public IPs. No unauthorized access.

“True Zero Trust
Networking.”

powered by
SElink™

Connect Anywhere

– Securely.

Whether you're in a refinery, offshore platform, or remote site, Conquest F5_{SE} maintains secure connectivity across LTE, 5G, Wi-Fi – automatically reconnecting when the link drops.

Zero Overhead.

Maximum Efficiency.

SElink™ Zero Trust Networking adds no bandwidth or processing burden. Its zero-overhead protocol maximizes efficiency, ensuring faster, more stable, and more reliable communication. This directly translates into longer F5 SE uptime in demanding field conditions.

“Secure doesn’t have to mean slower.”

SElink™

*Post-Quantum Ready
Compliant Security.*

Post-Quantum Ready. Certified Secure.

SElink™ aligns with international Zero Trust standards, using a future-ready security architecture built to withstand both current and next-generation threats. The SElink™ design anticipates advances in quantum computing, ensuring the F5 SE remains robust, trustworthy, and operationally secure throughout its entire lifecycle and beyond.

Why Traditional Communication Isn't Enough.

Table 3

	Phone/SMS	WhatsApp/Signal	Conquest F5 SE + SElink™
Encryption Scope	Weak or limited	App-only	Zero Trust
Security Control	Telecom	App Provider	Enterprise
Metadata Exposure	High	Partial	None
Network Type	Public	Internet	Private SElink Network
Integration	None	Minimal	NAS / IoT / PTT ready
Reliability	Vulnerable	Consumer-grade	Mission-critical
Industrial Use	✗	⚠	✓

Technical Overview at a Glance

Capability

- Zero Trust Architecture
- Multi-Network Operation
- Dynamic Encryption
- Certified Secure
- Energy Efficiency
- Integration
- Management

Description

- Eliminates VPNs and open ports
- LTE, 5G and Wi-Fi
- Auto key rotation
- Complied with PCI-DSS & NIST Guidelines
- 60% less power consumption
- Compatible with NAS, PTT, IoT Ready
